**Date of construction: 1912**  
**Style: Vernacular, Western False Front**  
**Significance: Compatible**

Shortly after fire that destroyed hotel on the site. Single story frame building with gable roof oriented longitudinally on lot 21 feet wide. Historic views of ca. 1915-1920 show that siding and false front are shiplap and that false front had the kind of wooden cornice which made this vernacular type the simplest expression of the Italianate Style. The shop front had traditional display windows and wood bulkheads. About 1956 the exterior was comprehensively stuccoed and the cornice removed. While this property dates from the secondary period of development, it is presently classified for tax purposes as compatible owing to the effect of the 1956 alterations upon the character of the building.

The upper wall and the Franklin Street facade, which is essentially blind, are unaltered and, like the Old Post Office, are divided vertically by beveled brick pilasters and corbeled string courses, the upper-

most of which is denticulated. The Main Street storefront was altered with a large display window and angled entrance bay. The upper wall is now supported at the corner by a free standing cast iron column. In 1960 a cement block living quarters addition was added to the rear. This building historically housed a saloon, grocery store and confectionery.

**Date of construction; c. 1874. Jones & Jones Addition (Bar) 1920**

Significance: Primary; addition compatible  
This single story building of locally made brick is understood to be the oldest brick building in Weston, having survived the devastating fires of 1874 and 1883. It is rectangular in plan with an approximate frontage of 40 feet on Main Street. The facade is organized into four bays in which openings are recessed in deep reveals and were, historically, protected by iron shutters. The window treatment in these exceptionally tall reveals has been modified considerably, but the brick piers dividing the bays are intact. Between 1900 and 1905 a single-story frame addition with an approximate frontage of 100 feet on Main Street was constructed on the east side. Because of the extensive alteration of the façade of the single story addition, it is separately classified for tax purposes, as compatible even though it dates from the secondary period of development in the district.
